ECO - CONFERENCE® : MOTIVES

The Resolution of the 1995 Eco-Conference® stated that every odd year in Novi Sad the scientific-professional conference would be organized on environmental protection of urban and suburban settlements .

The organizer was motivated by the fact that the industrial development and intensive urbanization have not been accompanied either by rational use of natural resources or protection of the environment. The initial idea was that the Eco-Conference® should become a traditional meeting of scientists and professionals who would contribute to solving of various environmental problems by expressing and exchanging experiences, opinions and ideas.

In order to complete the general goals of the conference programme, in even years starting from 2000, the complementary Eco-Conference® on safe food has been organized.

From the year 2007 the Eco-Conference® has a purely scientific character, as decided by the Programme Council of the Ecological Movement of Novi Sad, as its organizer.

ECO - CONFERENCE® : OBJECTIVES

The Eco-Conference® is organized in order to:

- Provide objective views (avoiding under - or overestimating) on causes/agents causing environmental disbalance and levels of ecological threats to urban and suburban environment.
- Provide valuable information-communication basis for developing mid-term and long-term strategic programmes for (a) integral environment protection, (b) commodity quality protection, (c) assessment of life quality and (d) promoting and supporting the concept and practice of sustainable development.

Consequently, each Eco-Conference® is a multi-dimensional event, in which scientists and experts of various profiles present and discuss numerous aspects of living and working conditions.

ECO - CONFERENCE® : THEMATIC SCOPE

Papers submitted for the Eco-Conference® may target any topic within the Conference's general thematic framework:

a) Physical components of urban environment related to places of work, residence and recreational activities:

- Air, water, soil, biosphere-biota
- Noise, vibrations, radiation, light

b) Social components of urban environment:

- Socio-economic position, security, employment, civil rights concerning work, education, retirement
- Cultural-spiritual values, heritage, traditional craft
- Security challenges and community support to the family as the basic social unit

In view of the expansion of industrial civilization, intense urbanization, demographic changes, economic turbulence in transitional societies, the Eco-Conference® focuses on causes and consequences of environmental degradation, as well as on protection measures, agents and activities, improvements and good practices.

The general thematic framework stresses the fact that there are no borders preventing the chain-effects of environmental degradation and also covers the problems related to processing industries (chemical, oil, textile, leather, metal, cellulose...)

OFFICIAL LANGUAGES OF THE ECO - CONFERENCE®

The Eco-Conference® official languages are English.
The Proceedings is published in English.
